

SEMINAR SERIES IN BIOSTATISTICS

June 25, 2020

14:30 - 15:30

Zoom (MEETING ID) 645 1958 0905

Password: 803296

Dr. Gianmarco Mignogna

University of Milano-Bicocca

Milan, Italy

Patterns on item nonresponse are non-random and have a genetic basis

Item nonresponse occurs when no substantive answer is recorded for a study participant on a given item. This nonresponse is interesting both as a behavioural choice and as a statistical concern from the resulting missing data. The current study aims to evaluate the contribution of genetics in item nonresponse between individuals
