

SEMINAR SERIES IN BIOSTATISTICS

May 30, 2019

13:30 - 14:30

Seminar Room: Aula De Lillo

Building U7 - 2nd floor

Dr. Andrea Bellavia

Department of Environmental Health

Harvard T.H. Chan School of Public Health

Boston, USA

Machine learning in epidemiology - opportunities and challenges

Epidemiology and public health are not exempt from the so-called Big Data revolution. Yet, machine learning and other data science techniques are seldom used and discussed in this field. This seminar will provide an overview of the opportunities that big data offer in epidemiological research, and discuss some of the challenges that make machine learning applications in this field uniquely challenging.
